

**NEW - advanced search for numerous patterns over multiple databases\*)**

KEEP TRACK OF THE ORIGINAL SOURCES

# ALLTHATSTATS

This internet platform provides direct access to

- +65,000 databases
- +1,000 million time series

**World Bank, UNIDO, IMF, OECD, ECB, EUROSTAT**

\*) Boost your time series retrieval to the next level by AllThatStats' Massive Data Analysis. Start an automated search for numerous patterns over +100 million time series e.g. to find more recent figures or more complete/longer data histories. Get inspired: come up with new breathtaking ideas and fundamental scientific insights.

# INTRO

## The statistics platform

AllThatStats provides direct access to approx. 65,000 databases with around 1,000 million time series from official sources. Regularly updated it's an unique repository of the world's most important statistical data collections.

## AllThatStats comes with

- extra fast retrieval tools (keyword search, hierarchical search, search by database)
- powerful filter tools, supporting your selection work at database level
- completed by Massive Data Analysis for running automated mass regressions within seconds (e.g. to identify highly correlated series)
- editable table and chart views
- export functionalities
- tools for ad-hoc time series analyses
- automated update notifications at database level
- extensive online support by the implemented help centre
- personalised watch lists for storing your retrieval work in reports -> recallable whenever updates are available and prepared to be implemented into automated work flows (e.g. linking an ATS report file to your Excel application to update your data sheets/presentations automatically when started)
- AllThatStatsNOW, the personalised cross-platform data access for communicating statistics directly via Twitter, Facebook or WhatsApp (extract statistical facts on the fly and share them in your social networks)
- AllThatStats Apps and Skills
- My Account, your personal dashboard to manage/access your work (AllThatStats watch list -> your reports, AllThatStatsNOW -> your sheets)

ALLTHATSTATS.COM

# SOURCES

ALLTHATSTATS provides access to the official statistics of

- international organisations such as the World Bank, the UN, the IMF, the OECD, the WTO, the FAO and the European Union
- central banks such as the FED, Deutsche Bundesbank and ECB
- the German Statistical Office
- supplemented by unique data collections focused on the World's environmental situation and the Intra- and Extra-EU trade induced carbon dioxide emissions (measured for 10,000 commodities according to the 8-digit level of the Combined Nomenclature)

# DATA ACCESS

IDENTIFY THE CORRECT TIME SERIES THAT FIT YOUR NEEDS WITH THE POWER OF ALLTHATSTATS

**AllThatStats provides extra fast and comfortable retrieval tools:**

- Keyword search
- Hierarchical search
- Search by database

ALLTHATSTATS.COM

## DATA ACCESS

# KEYWORD SEARCH

ALLTHATSTATS has been optimised for fast data retrieval at any level of work.

At the top of each page, ALLTHATSTATS provides the possibility to define a query and to start a simultaneous search through all sources by keywords.

Search terms without any prefix are interpreted as „and search“.

Other operators in keyword search:

- „OR“ for „or search“
- „-“ for „not“
- „?“ wildcard for a single character
- „\*“ wildcard for one or more characters

ALLTHATSTATS.COM

## DATA ACCESS

# HIERARCHICAL SEARCH/ SEARCH BY DATABASE

## HIERARCHICAL SEARCH

The ALLTHATSTATS homepage is also the home of the main search tree: it controls direct access to all sources by hierarchical breakdown, e.g.:

- OECD
  - Economic Indicators
    - Main Economic Indicators

ALLTHATSTATS loads the entire database finally selected - here: Main Economic Indicators - into its database section for further action.

## SEARCH BY DATABASE

ALLTHATSTATS' „Help center“ provides a detailed documentation ref. the sources and databases:

- check for the source
- check for the database

ALLTHATSTATS.COM

## DATA ACCESS

# FILTER/SEARCH AT DATABASE LEVEL

At database level ALLTHATSTATS presents the entire database previously selected.

At this stage, a powerful filter tool helps identify the series requested:

The underlying official classification plan has been empowered to scan the database classification plan and check for relevant filter branches, e.g.:

OECD's Main Economic Indicators

- Location
  - Australia
  - ...
- Subject
  - Leading indicators OECD
  - ...
- Measure
  - Level, rate or national currency
  - ...

additionally supported by a local keyword search.

ALLTHATSTATS.COM

## DATA ACCESS

# MASSIVE DATA ANALYSIS

## TIME SERIES RETRIEVAL WITH „BIG DATA“

### Search for numerous patterns

ALLTHATSTATS Data Analysis supports your research in statistical databases by exploring millions of time series within the split of second (annual series only). The best correlated ones (positive and negative) be presented in hit lists and can be visualised at the push of a button.

This tool makes ALLTHATSTATS an unique statistical time series application to

- scan for best series, e.g. to identify the most up-to-date GDP series within various statistical sources
- check given time series for completeness and correctness
- search by data patterns to identify poorly documented or unknown time series
- explore and discover new exciting economic correlations

Each pattern can be shifted forward or backward in time manually, e.g. to check for delayed or precursory impacts. For your advanced research work the top-negative correlated series can be calculated too.

Automated pattern transfer

Each time series selected by your ALLTHATSTATS retrieval work can automatically analysed for „best“ correlations on the fly.

Generating patterns manually

Alternative you can define your own patterns, e.g. to retrieve for some additional information ref. non or bad documented time series.

ALLTHATSTATS.COM

DATA PROCESSING

DATA

PRESENTATION

All time series selections are presented in charts and tables (not restricted by the number of series to be displayed simultaneously).

### Charts

- line charts
- scatterplots
- area charts, also stacked
- bar charts, also stacked

ready to be downloaded immediately as:

- png image
- jpeg image
- pdf document
- svg vector image

### Tables

To speed up data extraction, the latest numbers are presented first (lifo-rule). The table can be extended on demand by increasing the number of periods to be loaded. So, even big data tables are available within seconds.

ALLTHATSTATS.COM

## DATA PROCESSING

# DATA EXPORT/ SHARE

Time series selections can be exported/downloaded for further external usage whenever appropriate. Charts or tables can also be shared with colleagues or - when working on AllthatStatsNOW - communicated directly via Facebook, Twitter and WhatsApp.

### ATS tables/charts

- csv
- Excel
- LaTeX
- can be shared by link \*)

### Watch list/reports (-> My Accounts)

- Excel, specially prepared for automated Excel applications or, when reloaded at ATS tables/charts level:
- csv
- LaTeX
- can be shared by link \*)

### AllThatStatsNOW

- Facebook
- Twitter
- WhatsApp
- svg
- Excel
- png

\*)„Share“ generates a unique link ready to be passed on to colleagues or social networks, allowing direct access to the respective table or graph.

ALLTHATSTATS.COM

## DATA PROCESSING

# PUBLISHER

ALLTHATSTATS comes with „Publisher“, to generate graphics in high qualities (up to 600 dpi) „camera-ready“ for easy implementation into presentations or publications.

Publisher provides charts for the selected data time series, which can be edited (e.g. headers, axes or legends) and downloaded in various formats:

- pdf
- png
- svg
- R-snippets incl. data file

ALLTHATSTATS.COM

DATA PROCESSING

AD-HOC ANALYSIS

ALLTHATSTATS' calculator provides a set of statistical tools ready to start individual ad-hoc time series analyses:

- Pre-defined functions
  - lag
  - moving average
  - interpolation of missing values
  - forecasts
  - difference calculation
  - rate of change calculation (compounded and continuously compounded)
  - interpolation of missing values
  - forecasts
- general statistical figures (min, max, mean, standard deviation, covariance)
- time series calculator

ALLTHATSTATS.COM

## DATA PROCESSING

# WATCH LIST

### ALLTHATSTATS TIME SERIES SELECTIONS FOR REPEATED USAGE

Create personalised watch lists for storing your retrieval work (directly at chart or table view level) in reports -> recallable whenever updates are available and prepared to be implemented into automated work flows (e.g. linking an report file to your Excel application to update your data sheets/presentations automatically when started):

- save repetitive and time consuming retrieval work as a collection of reports in your personal watch list
- synchronise your work with AllThatStats latest data automatically
- run up-to-date reports directly from your watch list
- connect your watch list to ALLTHATSTATSWATCHAPP (coming soon)

Example: Compose your personal database directly from the ALLTHATSTATS platform by providing your data selections as reports at a common watch list (e.g. "your national accounts report", "your population statistics report", "your chemical market report"). Make your watch lists/reports available for your colleagues, students or personal use. ALLTHATSTATS keeps them updated automatically.

ALLTHATSTATS.COM

# UPDATE NOTIFICATIONS

## Subscribe for your personal update notification at database level:

- open "notify when updated" at database level
- key in your e-mail address
- AllThatStats keeps you informed as soon as the corresponding database is going to be updated for the next time

ALLTHATSTATS.COM

# SUPPORT

**AllThatStats provides a broad range of customer support.**

Each database has been supplemented - as far as provided by the source - by its classification plan, corresponding methodological notes and footnotes for each data point.

In addition ATS provides:

- manuals and online tutorials
- listings of often used abbreviations
- direct access to all relevant glossaries (e.g. OECD, Eurostat, European Central Bank, IMF, UN)
- more in-depth articles referring to often requested time series/themes

ALLTHATSTATS.COM

# COMMUNICATING STATISTICS

## COMMUNICATE FACTS

### World's statistics at your mobile device

Participate in this sensational chart building 'machine'. It not only helps to retrieve and visualise time series in seconds.

Edit/store the work at your personal account and share your final charts with friends and colleagues directly from the screen via Facebook, Twitter or WhatsApp.

- specially designed for your mobile devices
- immediate access to millions of official statistical time series
- supported by 'intelligent' retrieval algorithms
- create great charts on the fly
  - ready for publication and download in high resolution formats
  - easy to edit
  - direct access to Massive Data Analysis
  - directly shareable with social networks
  - storable at My Account's sheets for further usage and
- export ALLTHATSTATS data sheets or embed them directly into your work

ALLTHATSTATS.COM

# MY ACCOUNT

Keep track on your works. Login at My Account.

All ALLTHATSTATS licencees can open an unlimited number of personal accounts at My Account to save their retrieval work for further usage.

My Account is your personal dashboard to control/access all you work in one place:

- to save your retrieval work at AllThatStats (watch list/reports)
- to save your graphic sheets at AllThatStatsNOW

You are requested to create your personal account once, when using one of the services for the first time (there is no need to act proactively).
